[Windows 7 Manager V4.3.8 Final With KeyGen](#)

The screenshot displays the PTV Visum software interface. The main window is titled 'Network editor (Flow bundle)' and shows a network diagram for 'A-Village'. The diagram consists of several nodes connected by links, with various attributes like 'VoVehPIT(AP)' and 'VoPersPUT(AP)' associated with the nodes. A 'Selected conditions' table is visible in the lower right of the network editor:

Combination	Condition
1	First Zone 100
2	Or
3	First Link 1 U
4	And then not Link 3 U

On the right side, there is a 'PyCrust' Python script editor window. The script contains the following code:

```
aFlowBundle = Visum.Net.FlowBundle
aFlowBundle.Clear()
aFlowBundle.DemandSegments = 'P'
aZone = Visum.Net.Zones.ItemByKey(100)
aLink1 = Visum.Net.Links.ItemByKey(10, 11)
aLink2 = Visum.Net.Links.ItemByKey(20, 21)
anActivityTypeSet = aFlowBundle.CreateActivityTypeSet()
anActivityTypeSet.Add(1)
aNetElms = Visum.CreateNetElements()
aNetElms.Add(Visum.Net.TSystems.ItemByKey('B'))
aFlowBundle.CreateConditionWithRestrictedSupply(aZone, aNetElms, False, anActivityTypeSet)
aFlowBundle.CreateNewGroup()
aFlowBundle.CreateCondition(aLink1, anActivityTypeSet, False)
aFlowBundle.CreateCondition(aLink2, anActivityTypeSet, True)
aFlowBundle.ExecuteCurrentConditions()
```

The script editor also shows a 'Namespace' window with the following content:

```
Ingredients
Type: <type 'dict'>
```
